Nowadays, teenagers seem to forget that healthy food is important in their lives. They have a great passion for eating sugary, (chocolatey/ chocolaty/ choclaty), salty and greasy food. This is so dangerous! What makes things (worst/ best/ worse) is the fact that they don't take any sporting activity. (They're glued always/ They're always glued/ They were always glued) to one screen or another: PC's, computers, TV, smart phones... etc. How (a weird/ weird/ an weird) this is! They're actually damaging their health, developing risky (disease/ diseases/ illness) and getting fatter and fatter. I think adolescents should absolutely (watching/ watched/ watch) their diets, take sporting activity as a daily routine and check their health at the doctor's. Do it now before it's too late.
