Fill in the table with two words from the list below :

protect - local - won

/ ʌ /	/ ə /
.....

II/ LANGUAGE (12 marks) :

1° Circle the right alternative (3 mks) :

The amount of pollution in big cities and even small towns may (deal with – be due to – contribute to) diseases and ailments like cancer and asthma.

Exposure to any kind of environmental (polluted – polluter – pollutant) like smog, automobiles, factories and littering can have a significant impact (in – on – at) both human health and the health of the earth.”

The United States is one of the top five most polluting countries causing unbreathable air and undrinkable water. I strongly believe that The President of The United States should take control of environmental issues concerning pollution.

I also believe that every single citizen has to do his part because this country is (**us – ours – ourselves**) and it's time for us to take responsibility for our actions. In my opinion, other leaders will join The U.S President and work to make their countries (**environmentalist – environmental - environmentally**) healthy. If the U.S is going to maintain its status as a world power, we need to prevent health and economic problems caused by pollution and (**preserve – damage – destroy**) our ecological system as well as our future generations.

2° Fill in the blanks with 7 words from the list below. (3.5 mks) :

'll be able to - recycle - benefit - threaten - provide - forbid - garbage - species - extinction
 Showing gratitude to our mother earth and taking care of her would result in a significant drop in greenhouse gas emissions, deforestation, wildlife , and global hunger. One person can make a difference in protecting our ecological system ; so what about joining our hands to prevent and reduce pollution and a cleaner, safer and healthier environment for ourselves as well as our future generations. Every individual can help cut down on the amount of he makes. He can paper, plastic, glass bottles, and metal cans. Governments can pass laws that or limit the use of chemicals that cause pollution. Laws can stop factories from dumping poisonous chemicals in lakes, rivers, and the ocean. Going vegan may the environment by reducing the global farmland by 75%. The more people who go vegan, the better we feed the hungry. Furthermore, vegans are less likely to develop heart disease, diabetes, cancer, and high blood pressure and live a healthier life.

3° Supply the right tense or form of the bracketed words (3.5 mks) :

May 31st is World No Tobacco Day. The aim of this day is to raise (**aware**) of the health issues of tobacco smoking which is the leading preventable cause of death worldwide. It is also to help people understand how (**addiction**) tobacco can be. In addition, the organizers hope that people who smoke (**take**) a 24-hour break on this day. This day was started by the World Health Organization in 1987 and aimed to encourage smokers to quit smoking. For instance, The WHO rewarded China with a special prize. The country is the world's (**large**) tobacco producer and consumer and more than one million of Chinese die each year from (**in relation to smoking**) diseases like lung cancer and heart stroke. (**Not smoke**) as well as passive ones might suffer from the same health problems too. A WHO spokesperson said: "We applauded Beijing for its strong and determined leadership in (**protect**) the health of its people by making public places smoke-free.

4° Match sentences' parts to get a coherent paragraph. There is an extra part in B (2 mks) :

A	B
1- I am writing this letter to grab your kind attention	a- to serious health issues and a hike in the air-pollution.
2- I have noticed pollution and a number of gases coming	b- to get rid of the trash.
3- Also, most of the people burn their dumped garbage and plastic in order	c- from the vehicles and chimneys of the companies and the industries.
4- These gases which are hazardous may lead	d- some appropriate and strict action against the issue.
5- I would request you to kindly look into the matter and take	e- care of endangered species and protect their natural habitat.
1 + f / 2 + . / 3 + . / 4 + . / 5 + .	f- towards the issue of air pollution.
